## ONYX Pro

Born from a heritage of excellence in espresso machines and a history of pursuing innovative solutions that push coffee technology further, we are very proud to introduce ONYX - the professional-grade premium espresso machine that defines attainable luxury and lets you express your own personal style. Combining insight from experienced baristas with proven brewing technology and energy-saving software we have created a premium espresso machine that is as smart and reliable as it is elegant and beautiful.

We realize that every serving space is unique, so to make sure that ONYX fits perfectly into any environment we have designed it to be easily customized through easily changeable graphic slots, custom inserts in the exterior panels, or by custom-designed side and back LEDs.

PID Multiboiler

Group head independent displays

LED lighting on side and rear panels

Touch Screen and new Barista and ECO software

New auto-steamer lever

Flushing button function

Click-on high group drip tray

## Focus on Expobar

With taste and quality in focus, Crem International manufactures and markets the Expobar brands. Expobar offers traditional espresso machines of the highest quality. With development and production in our own factories, we offer modern and innovative coffee and beverage solutions for tomorrow's needs in hotels, restaurants and café, at work and in public spaces, where only the best is good enough.
